

# PRO X DRIP OIL

WELL PUMP DRIP OIL

## PRODUCT DESCRIPTION

### Pure Drip Oil For Deep-Well Turbine Pump Lubrication

PRO X Drip Oil is an extremely clean low viscosity oil designed to lubricate the shaft bearings of down-hole turbine pumps in agricultural use.

## PRODUCT APPLICATION

- Vertical turbine bearing lubrication for deep-well water pumps
- Anywhere clean, light low-viscosity lubrication is needed

## FEATURES AND BENEFITS

- **Low Viscosity:** Select base stocks are within the viscosity range for pump bearing lubrication as well as a wide variety of other functional uses. Flows in all weather conditions.
- **High Stability:** Superior refining techniques result in outstanding oxidation, thermal, and color stability, and no sulfur or polar compounds.
- **Colorless:** Severely hydro-treated base stocks are easy to see through and not likely to stain.
- **Biodegradable:** Unadulterated highly-saturated base stocks are inherently biodegradable.
- **Non-Additized:** High purity and extremely low odor allow multiple applications for this oil.

## TYPICAL TEST DATA

GRAVITY, SPECIFIC	0.862
GRAVITY, °API	32.6
DENSITY, LB./GAL.	7.2
COLOR	PALE
COLOR, ASTM	0.5 MAX
ODOR	CHARACTERISTIC
TAN	0.01
FLASH POINT, °C TYP	190
VISCOSITY AT 40°C, CST	14
VISCOSITY AT 100°F, SUS	77

## SPECIFICATIONS

Recommended for use in all deep-well turbine systems, including those from:

- Goulds
- Berkeley
- American/National Pump
- Franklin Electric
- Sargent
